TAP WATER

SDG 6

Clean Water and Sanitation

With the tap water station the university contribute to the realisation of the Sustainable Development Goal 6:

Ensure availability and sustainable management of water and sanitation for all.

SUSTAINABLE DEVELOPMENT GOALS

17 SDGs • 169 Targets

EXCELLENT QUALITY

In Germany, tap water is very strictly controlled by the Drinking Water Regulation.

The mineral structure of the water is also regularly checked by independent tests.

REDUCE CO₂ & WASTE

The production and transport of bottled water causes a lot of CO₂.

Tap water, on the other hand, is free of packaging and saves on waste and CO₂.

SAVE MONEY & TIME

Tap water is always available and does not have to be carried home.

Besides saving time and waste, you can also save money!

TAP STATION

Dos & Don'ts

use reusable bottles or cups

take care not to splash

do not put any leftover
drink into the sink

do not use for rinsing
